Mounting instruction

Attach the slot connector in the groove at the height desired for mounting the screen, then use an allen key to lock in place with the screws.

Mount the support post into the frame at the center point of where you plan to mount the screen.

Attach the two connection rails to the screen, taking note to properly orient with the top of screen.

Mount the graphic panel.

Make 2 small hole in the graphic and one for the cable.

Mount the screen holder with the 2 screws.

Hook on the screen at the top of the holder.

Lock the screen with the two screws in the bottom of the screen rails!
